

**NO COOKING OIL &
WASTE LUBRICANTS**

NO GREASE

**NO OILY RESIDUES -
SLUDGE**

**NO CHEMICALS
& DETERGENTS**

**BY PROTECTING RAINWATER PIPES
WE PROTECT OUR OWN HOME**

Dear neighbours,

Flisvos Marina is a popular facility in Palaio Faliro and a valuable asset for the Southern suburbs, with **international awards for quality and environmental management**. It is endowed with clear waters and a huge green park, basic features for the quality of life we all deserve. For recreation, entertainment, relaxation.

This unique beauty is threatened when something other than water ends up in the rainwater pipes. **Cooking oil, waste lubricants, grease, oily residues and chemicals must end up solely in waste management and recycling facilities**. In the case that they end up in the rainwater pipes, they end up in the sea, polluting our Saronic Gulf, **our marina**, our coasts, the precious natural environment of our municipality.

Cooking oil, grease, oily residues and chemicals
do not belong in the rainwater pipes.
Only rain :)
